Little hands, big learning!

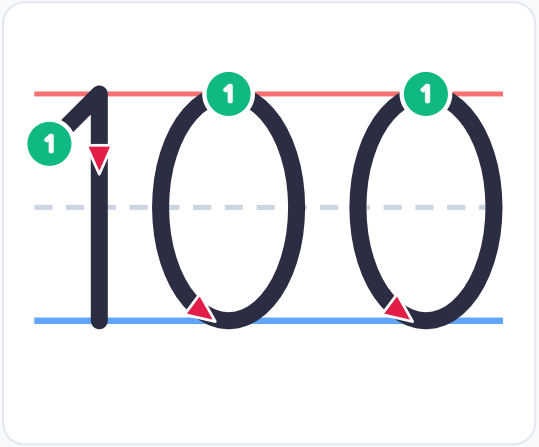

Name: _____

Welcome, grown-ups!

A counting workbook for the 100th day of school, and for any day you practice counting to 100.

Children trace the number 100, fill in a hundred chart, count by 10s, 5s and 2s, see that ten tens make 100, and learn tens and ones. Writing pages, a dot-to-dot, a paper crown and a certificate make the 100th day feel special.

How to read a number page

- The green number shows where to start, and which line comes first.
- The red arrow shows which way to go.
- Trace over the grey dots. Start at the green dot.
- Numbers sit on the blue line and reach up to the red line.

Tips for happy practice

1. **Print at 100%.** Choose “Actual size” on A4 or US Letter paper. A plain pencil and crayons are all you need.
2. **Count real things.** On the 100th day, collect 100 small things such as cereal pieces, pennies or beans. Count them in ten piles of ten.
3. **Count out loud.** Point and count by 10s: 10, 20, 30 and so on up to 100. Counting by 2s and 5s comes next.
4. **Little and often.** You do not need to finish the book in one day. One page is a good start, and the games make a nice break.
5. **Celebrate 100 days.** Wear the 100th Day crown (page 18) and hand out the certificate on the last page.
