34 animals to trace, color and name

✓ Trace ✓ Color ✓ Learn ✓ Have Fun!

Name: _____

Welcome, Parents & Teachers!

Tracing and coloring help children build the small hand muscles and the control they need for writing. In this workbook your child will meet 34 friendly animals. For each one they trace the dotted outline, color the picture and practice writing the animal's name.

How to use this book

- 1 Print at 100% (Actual size), not "Fit to page". This is the US Letter edition. A thick pencil or a triangular crayon is easy for small hands to hold.
- 2 Trace the dotted outline with a pencil. Go slowly. There is no wrong way around, and a wobbly line is a good start.
- 3 Color the picture on the right with crayons or colored pencils. Every color is a good color!
- 4 Say the animal's name out loud. Trace the dotted letters, starting at each green dot, then write the word on the empty line.
- 5 Read the fun fact together and talk about where the animal lives and what it likes to do.
- 6 Do one or two pages a day. Short, happy practice beats a long session.
